*** MIDWAY/MIDWAY FOOD VENDOR ELECTRICAL REQUIREMENTS***

Vendor Name: _____ Vendor Contact # _____

Vendors are responsible for his own cords and adapters to reach the available power source.

Vendors must know their Electrical needs for their trailer or set up prior to the event.

***110 Volts/20 amps (standard):** \$50 per hookup plus \$2 per additional amp required _____

***220 Volts/up to 30 amps:** \$75 per hookup plus \$2 per additional amp required _____

****Vendors requiring 50 amps or more will have Extra Charge on Electric hook ups. You must check with the Midway Director for availability & approval of higher hook ups before arriving at the event. Please contact the Festival Office 281-991-9500.**

(All other requirements MUST bring their own Generator)

HOW TO CALCULATE THE AMOUNT OF POWER YOU WILL NEED:

Reference the electrical ratings label located on each device that you intend to plug in. The label may state the amount of power (watts) that the device requires. If the label does not list the watts required, then you will need to multiply the current (amps) by the voltage (volts) to determine the power (watts). **YOU ARE ONLY CONCERNED WITH THE (INPUT) POWER.**

[Calculating the power of lights;]

Each light bulb should have a rating stamped on it in watts, i.e. 100W. Simply add all of your light bulbs together. So if you have 4 light fixtures, and each has a 100W bulb, then the total power required for your lights is 400W.

NOTE:

We are not responsible for voltage fluctuation or power failure due to temporary conditions. For your protection you should always install a surge protector on computer equipment and sensitive electronics. We will not be responsible for any damage or loss of equipment as a result of the nature of temporary power. All connected equipment must comply with all Federal, State, and local codes. We reserve the right to disconnect any equipment that does not meet code, or that we deem to be "unsafe". All connected equipment must be properly labeled indicating the required voltage, current, phase and frequency of the power source. All extension cords must be a minimum of 14/3 with ground. We reserve the right to inspect all equipment and connections to insure compliance with codes and to determine if a code violation or electrical hazard exist. If a problem is identified, your electrical service will be suspended until the problem has been rectified
